

Crumblers

High-Capacity Crumblers in Modular Design

Due to their flat design, the KAHL crumblers can be integrated into existing plants without any problem. The modular design ensures easy roll replacement towards the front or to the side. Our customers benefit from the advantages of a fully developed technology and solid machine construction.

- Direct drive for each roll
- Strongly reduced noise emission
- Continuously adjustable distance of the rolls
- Feeding either directly by the cooler or via proportioning rolls
- Specific adjustment of the crumble size
- Ease of operation and maintenance
- Reduced wear

Advantages for feeding

KAHL crumblers can process pellets and coarse-grained products. Crumbles have favourable properties in feeding.
